## STANDARD BULLET PULLER

## PRODUCT INSTRUCTIONS

### STANDARD BULLET PULLER

The RCBS Standard Bullet Puller utilizes the standard 7/8"-14 thread and may be used in any single stage reloading press having that thread. It is designed to pull jacketed, spitzer pointed style bullets. Do not pull pure lead bullets or bullets with a large portion of lead exposed at the nose as they will be badly distorted or the Collet may not grip the bullets at all.

#### TO USE:

Screw the Bullet Puller into the reloading press several turns and lock into place with the lock nut. Release any tension on the Bullet Puller Collet by turning the handle counter-clockwise so that the bullet to be pulled will enter easily.

Place the loaded cartridge in the proper shell holder and raise it until the bullet enters the collet. Turn the Bullet Puller Handle clockwise to get a good, tight grip on the bullet. Depending on the leverage system of your reloading press, give the handle a sharp upward or downward blow to force the cartridge away from the bullet.

Release the tension on the collet and the bullet will drop out. If the bullet sticks, gently tap the top of the Bullet Puller to release it.

If the bullet is sealed or crimped exceptionally tight, use the Seater Die to seat the bullet .005" deeper into the cartridge. This will break the seal and free the bullet for easy removal with the Bullet Puller.

RCBS® Bullet Puller Collets are available in the following calibers:

PART #	CALIBER	PART #	CALIBER
09419	.17	09429	.348
09420	.22	09430	.35/.38
09421	6mm	09437	9.3mm
09422	.25	09431	.375
09423	6.5mm	09432	.40
09424	.270	09433	.41
09425	7mm	09434	.416
09426	.30/7.35	09435	.44/11mm
